**REPORT ON REVIEW OF CONDENSED CONSOLIDATED INTERIM  
FINANCIAL INFORMATION**

To the General Assembly of  
Enerjisa Enerji A.Ş.

*Introduction*

We have reviewed the accompanying condensed consolidated statement of financial position of Enerjisa Enerji A.Ş. (“the Company”) and its subsidiaries (together will be referred as “the Group”) as of 30 June 2025 and the related condensed consolidated statements of profit or loss and other comprehensive income, changes in equity and cash flows for the six-month interim period then ended. Group management is responsible for the preparation and presentation of this consolidated interim financial information in accordance with Turkish Accounting Standards 34 “Interim Financial Reporting” (“TAS 34”). Our responsibility is to express a conclusion on this consolidated interim financial information based on our review.

*Scope of Review*

We conducted our review in accordance with Independent Auditing Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of consolidated interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Independent Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

*Conclusion*

Based on our review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial information is not prepared, in all material respects, in accordance with TAS 34 “Interim Financial Reporting”.

**NOTE 2 - BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS**

**2.1 Basis of Presentation**

The accompanying consolidated financial statements are prepared in accordance with the requirements of Capital Markets Board ("CMB") Communiqué Serial II, no: 14.1 "Basis of Financial Reporting in Capital Markets", which was published in the Official Gazette No: 28676 on 13 June 2013. The accompanying consolidated financial statements have been prepared in accordance with Turkish Financial Reporting Standards ("TFRS") and interpretations regarding these standards that have been put into effect by Public Oversight Accounting and Auditing Standards Authority of Türkiye ("POA") under Article 5 of the Communiqué. TFRS is updated through communiqués to be in line with the changes in International Financial Reporting Standards ("IFRS").

The interim condensed consolidated financial statements has been prepared in accordance with the formats stated in "Announcement regarding to TAS Taxonomy" which was published on 4 July 2024 by POA. Group's this interim condensed consolidated financial statements for the period ended 30 September 2024 have been prepared in accordance with the TAS 34 Interim Financial Reporting ("TAS 34"). Interim financial information does not include all the information and disclosures required to be included in the annual financial statements. In addition, significant accounting policies and significant accounting estimates and assumptions used in the preparation of the interim condensed consolidated financial statement for the six months period ended 30 June 2025 are consistent with consolidated financial statements as at 31 December 2024 except the ones disclosed in Note 2.4. Therefore, the interim condensed consolidated financial statements should be read and evaluated together with the annual financial statements prepared by the Group as of 31 December 2024.

**Financial reporting in hyperinflationary economy**

The consolidated financial statements and related amounts for prior periods have been restated for changes in general purchasing power of the functional currency and, as a result, are expressed in terms of the current measuring unit at the end of the reporting period in accordance with TAS 29 "Financial Reporting in Hyperinflationary Economies" standard.

TAS 29 applies to the financial statements, including the consolidated financial statements, of each entity whose functional currency is the currency of a hyperinflationary economy. If an economy is subject to hyperinflation, TAS 29 requires an entity whose functional currency is the currency of a hyperinflationary economy to present its financial statements in terms of the measuring unit current at the end of the reporting period.

As at the reporting date, entities operating in Türkiye are required to apply TAS 29 "Financial Reporting in Hyperinflationary Economies" for the reporting periods ending on or after 31 December 2023, as the cumulative change in the general purchasing power of the last three years based on the Consumer Price Index ("CPI") is more than 100%. POA made an announcement on 23 November 2023 regarding the scope and application of TAS 29. It stated that the financial statements of the entities applying Turkish Financial Reporting Standards for the annual reporting periods ending on or after 31 December 2023 should be presented in accordance with the related accounting principles in TAS 29, adjusted for the effects of inflation.

**NOTE 2 - BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS  
(Continued)****2.1 Basis of Presentation (Continued)****Financial reporting in hyperinflationary economy (continued)**

In accordance with the CMB's decision dated 28 December 2023 and numbered 81/1820, issuers and capital market institutions subject to financial reporting regulations applying Turkish Accounting/Financial Reporting Standards are required to apply inflation accounting by applying the provisions of TAS 29 to their annual financial statements for the accounting periods ending on 31 December 2023. The Group has applied IAS 29 "Financial Reporting in Hyperinflationary Economies" Standard in its consolidated financial statements prepared in accordance with International Financial Reporting Standards ("IFRS") as of and for the year end 31 December 2022. Therefore, the Group's first application date of TAS 29 has been determined as 1 January 2021.

As of 1 January 2021, retained earnings were amounting TL 3,297,321 before the adjustments made in accordance with TAS 29. As of 1 January 2021, restated amount of retained earnings after the adjustments made in accordance with TAS 29 is TL 6,165,170 with the purchasing power of 30 June 2025.

In this framework, while preparing the consolidated financial statements dated 30 June 2025, inflation adjustment has been made in accordance with TAS 29.

The table below shows the inflation rates for the relevant years calculated by taking into account the Consumer Price Indices published by the Turkish Statistical Institute ("TURKSTAT"):

<b>Date</b>	<b>Index</b>	<b>Adjustment Coefficient</b>	<b>Three -years compound inflation rates</b>
30 June 2025	3,132.17	1.00000	220%
31 December 2024	2,684.55	1.16674	291%
30 June 2024	2,319.29	1.35049	324%

The main lines of TAS 29 indexation transactions are as follows:

- As of the balance sheet date, all items other than those stated in terms of current purchasing power are restated by using the relevant price index coefficients. Prior year amounts are also restated in the same way.
- Monetary assets and liabilities are expressed in terms of the purchasing power at the balance sheet date and are therefore not subject to restatement. Monetary items are cash and items to be received or paid in cash.
- Fixed assets, subsidiaries and similar assets are indexed to their acquisition values, which do not exceed their market values. Depreciation has been adjusted in a similar manner. Amounts included in shareholders' equity have been restated by applying general price indices for the periods in which they were contributed to or arose within the Company.
- All items in the income statement, except for the effects of non-monetary items in the balance sheet on the income statement, have been restated by applying the multiples calculated over the periods when the income and expense accounts were initially recognized in the financial statements.
- The gain or loss arising on the net monetary position as a result of general inflation is the difference between the adjustments to non-monetary assets, equity items and income statement accounts. This gain or loss on the net monetary position is included in net profit.

**NOTE 2 - BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS  
(Continued)**

**2.1 Basis of Presentation (Continued)**

**Financial reporting in hyperinflationary economy (continued)**

The impact of the application of TAS 29 Inflation Accounting is summarized below:

*Restatement of the Statement of Financial Position*

Amounts in the statement of financial position that are not expressed in terms of the measuring unit current at the end of the reporting period are restated. Accordingly, monetary items are not restated because they are expressed in the currency of the reporting period. Non-monetary items are required to be restated unless they are expressed in terms of the currency in effect at the end of the reporting period. The gain or loss on the net monetary position arising on restatement of non-monetary items is recognized in profit or loss and presented separately in the statement of comprehensive income.

*Restatement of the Statement of Profit or Loss*

All items in the statement of profit or loss are expressed in terms of the measuring unit current at the end of the reporting period. Therefore, all amounts have been restated by applying changes in the monthly general price index. Depreciation and amortization expenses are restated using the restated balances of property, plant and equipment, intangible assets and right-of-use assets.

*Restatement of Statement of Cash Flows*

All items in the statement of cash flows are expressed in terms of the measuring unit current at the end of the reporting period.

*Consolidated Financial Statements*

The financial statements of a subsidiary whose functional currency is the currency of a hyperinflationary economy are restated by applying the general price index before they are included in the consolidated financial statements prepared by the parent company. If the subsidiary is a foreign subsidiary, its restated financial statements are translated at the closing rate. When consolidating financial statements with different reporting period ends, all monetary and non-monetary items are restated in accordance with the measuring unit current at the date of the consolidated financial statements.

*Comparative Figures*

Relevant figures for the previous reporting period are restated by applying the general price index so that the comparative financial statements are presented in the measuring unit applicable at the end of the reporting period. Information disclosed for prior periods is also expressed in terms of the measuring unit current at the end of the reporting period.

**2.2 Functional and Presentation of Currency**

The individual financial statements of each Group entity are prepared in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each entity are expressed in Turkish Lira ("TL"), which is the functional currency of the Group, and the presentation currency for the consolidated financial statements.

(Amounts expressed in thousands of Turkish Lira ("TL") in terms of purchasing power of the TL at 30 June 2025 unless otherwise indicated. Currencies other than TL are also expressed in thousands unless otherwise indicated.)

**NOTE 2 - BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS  
(Continued)**

**2.2 Functional and Presentation of Currency (Continued)**

In preparing the financial statements of the individual entities, transactions in foreign currencies (currencies other than TL) are recorded at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are converted at the rates prevailing on the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Gains and losses arising on settlement and translation of foreign currency items are included in the consolidated statement of profit or loss and other comprehensive income.

**2.3 Comparative Information and Reclassification of Prior Period Consolidated Financial Statements**

In order to allow for the determination of the financial situation and performance trends, the Group's consolidated financial statements have been presented comparatively with the prior period.

If the presentation or classification of the current period financial statements is changed, in order to maintain consistency, comparative information is also adjusted or reclassified in line with the related changes.

The Group does not have any material reclassifications and adjustments in the interim condensed consolidated financial statements as at 30 June 2025.

**2.4 Changes in Accounting Policies**

The significant changes that were made on accounting policies applied retrospectively and the financial statements of preceding period are restated. No changes have been applied to the accounting policies of the Group in the current period.

**2.5 Changes and Misstatements in Accounting Estimates**

If changes in accounting estimates are related to only one period, the changes are applied prospectively in the current period in which changes are made. If changes in accounting estimates are related to future periods, the changes are applied prospectively both in the current period in which changes are made and also in future periods. The accounting misstatements which are identified are applied retrospectively and consolidated financial statements of preceding period are restated. No changes have been applied to the accounting estimates of the Group in the current period.

**2.6 Going Concern**

The Group prepares consolidated financial statements in accordance with the going concern assumption and does not anticipate a significant risk.

The business models of electricity distribution companies operating in Türkiye are to make distribution infrastructure investments and reimburse the investments within 10 years together with a weighted average cost of capital (WACC) regulated by the Energy Market Regulatory Authority (EMRA). Therefore, a short-term financing need is inherent in the business model. The over or under invoicing made by the Group is calculated at the end of each year and adjusted by the EMRA through tariffs after two years. These amounts are classified as long-term receivables in the balance sheet. At the same time, deposits received from customers by retail companies are classified as other short term payables since they are treated as payable on demand. However, the cash outflows of those amounts expected to occur in the long term. As of 30 June 2025, current liabilities exceeds the current assets amounting to TL 6,465,478 in the consolidated financial position of the Group. Group ensures the any possible short term cash need with its strong operational cash inflow and effective financing management.

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved when the Company:

- Has power over the investee;
- Is exposed, or has rights, to variable returns from its involvement with the investee; and
- Has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- The size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- Potential voting rights held by the Company, other vote holders or other parties;
- Rights arising from other contractual arrangements and;
- Any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

**2.8 New and Amended Turkish Financial Reporting Standards**

a) Amendments that are mandatorily effective from 2025

The Group evaluates the effects of these standards, amendments and improvements on the consolidated financial statements.

b) New and revised TFRSs in issue but not yet effective

The Group has not yet adopted the following standards and amendments and interpretations to the existing standards:

**TFRS 17 *Insurance Contracts***

TFRS 17 requires insurance liabilities to be measured at a current fulfillment value and provides a more uniform measurement and presentation approach for all insurance contracts. These requirements are designed to achieve the goal of a consistent, principle-based accounting for insurance contracts. TFRS 17 has been deferred for insurance, reinsurance and pension companies for a further year and will replace TFRS 4 *Insurance Contracts* on 1 January 2026.

**Amendments to TFRS 17 *Insurance Contracts* and Initial Application of TFRS 17 and TFRS 9 – Comparative Information**

Amendments have been made in TFRS 17 in order to reduce the implementation costs, to explain the results and to facilitate the initial application.

The amendment permits entities that first apply TFRS 17 and TFRS 9 at the same time to present comparative information about a financial asset as if the classification and measurement requirements of TFRS 9 had been applied to that financial asset before.

Amendments are effective with the first application of TFRS 17.

#### Mandatory investments

As the regulated incumbent electricity distribution operator, the distribution companies have an obligation to make any required expansion investments to the grid infrastructure in order to ensure the security of supply to all customers of the respective region. Such expansion investments are mostly a result of new customer or transmission connection requests as well as new street lighting projects initiated by municipalities that also fall under the regulated activities of Distribution companies.

#### Energy sales agreements

Distribution and retail companies signed Energy Sales Agreements with EÜAŞ in order to obtain their energy needs during the year. These energy sales agreements have been established based on regulated prices. During the year, the Group is obliged to purchase the energy quantity stated in these agreements. At the current operating conditions and market structure, the Group's energy needs are higher than the contracted quantities and the Group makes purchases regularly from EPIAŞ. As a result, the Group management does not expect any liability related to the Energy Sales Agreements arising from not fulfilling the requirements of Energy Sales Agreements.

**NOTE 20 - TAX ASSETS AND LIABILITIES (Continued)**

Corporate tax

The Group is subject to Turkish corporate taxes. A provision is made in the accompanying financial statements for the estimated charge based on the Group's results for the period.

Corporate tax is applied on taxable corporate income, which is calculated from the statutory accounting profit by adding back non-deductible expenses, and by deducting the tax-exempt earnings, other exempt income and other deductions (losses of previous periods, investment incentives utilized).

With the Law No. 7456 published in the Official Gazette dated 15 July 2023, the first paragraph of Article 32 of the Corporate Tax Law was amended and the corporate tax rate was increased to 25% for corporate earnings for the year 2023 and the following taxation periods.

Valid rate of corporate tax as of 30 June 2025 is 25% (31 December 2024: 25%).

In Türkiye, temporary tax is calculated and accrued on a quarterly basis. The companies apply 25% tax rate over their quarterly profits (25% for the year 2024) when calculating their temporary tax payables; which they are obliged to declare via Advance Corporate Tax Declaration by the end of the 14th, and pay by the end of the 17th of the 2 months following the related period. Quarterly Advance Corporate Tax payments made within a year are deducted from the Corporate Income Tax calculated for the same fiscal year. Following the netting-off, if there is still remaining Advance Corporate Tax balance, it can be deducted from any other financial debt owed to the State or can be received in the form of a cash refund.

Losses are allowed to be carried 5 years maximum to be deducted from the taxable profit of the following years. Tax carry back is not allowed.

In Türkiye, there is no procedure for a final and definitive agreement on tax assessments. Companies file their tax returns between 1-25 April following the close of the accounting year to which they relate. Tax authorities may, examine such returns and the underlying accounting records and may revise assessments within five years.

Income withholding tax

In addition to corporate taxes, companies should also calculate income withholding taxes and funds surcharge on any dividends distributed, except for companies receiving dividends who are Turkish residents and Turkish branches of foreign companies. With the Presidential Decree No. 9286 published in the Official Gazette dated 22 December 2024 and numbered 32760, the income withholding tax rate was applied as 15% (31 December 2024: 15%). Undistributed dividends incorporated in share capital are not subject to income withholding tax.

##### Deferred tax

The Group recognizes deferred tax assets and liabilities on the temporary timing differences between the legal books and the financial statements prepared in accordance with TFRS. Such differences generally arise from timing differences of some revenue and expense balances in legal books and financial statements prepared in accordance with TFRS and are explained below.

As of 30 June 2025, 25% tax rate is used in the deferred tax calculation (31 December 2024: 25%).

Deferred tax assets may only be recognized to the extent it is probable that sufficient taxable profit will be available in the future. In case of a probable tax advantage, deferred income tax asset is calculated for unused carry forward tax losses.

At 30 June 2025, the Group recognized deferred tax assets amounting to TL 1,930,805 for unused carry forward tax losses amounting to TL 7,723,221 since it was considered as probable that there would be sufficient taxable income in the subsequent periods to utilise such assets based on the forecasts made (31 December 2024: TL 3,091,745 and TL 12,366,979 respectively).

The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. A positive number indicates an increase in profit or loss before taxation on income where the TL strengthens against the relevant currency.

**NOTE 23 - FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Continued)**

**23.1 Financial Risk Factors (Continued)**

**23.1.2 Interest rate risk management**

As of 30 June 2025, the Group has TLREF indexed loans and bonds with floating interest rate risk. Interest rate risk arising from those loans are managed through perpetually monitoring and analyzing market interest rates and carrying out sensitivity analysis for interest rate changes in order to monitor possible cost changes within the scope of risk management activities.

**Fair value of financial instruments**

The fair value of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models.

**Categories of financial instruments and fair values**

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by a quoted market price, if one exists.

The carrying amounts of foreign currency denominated monetary assets which are translated at year end exchange rates are considered to approximate their fair values.

The carrying values of cash and cash equivalents are estimated to be at their fair values since they have short term maturities and have little impairment risk.

The carrying value of trade receivables and other receivables which are both discounted and provided provision for doubtful receivables are estimated to be at their fair values.

The fair values of the financial liabilities with fixed interests are presented by calculating their discounted cash flows using the market interest rate effective at the reporting date. The fair value of financial liabilities with variable interest rates are considered to be equivalent to the carrying amount due to the expectation that the floating interest rate will change accordingly with the market interest rates. Fair values of the borrowings are higher than their carrying amounts amounting to TL 82,665 as of 30 June 2025 (31 December 2024: TL 247,081 lower).

Discounted values of trade payables and other payables are assumed to approximate their respective carrying values.

**Assets and liabilities subject to valuation and fair value of financial instruments**

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by a quoted market price, if one exists.

The classification of the Group's financial assets and liabilities at fair value is as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2).
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

In the consolidated balance sheet, derivative financial instrument is recognized at fair value. The fair value of derivative financial instrument is determined by using valuation technique, which can be regarded as Level 2.

The following table gives information about how the fair values of financial instruments subject to valuation are determined.

Financial assets / (Financial liabilities)	Fair value / revalued amount		Fair value hierarchy
	30 June 2025	31 December 2024	
Derivative financial instruments	187,534	(414,022)	Level 2
